

The Consortium for Environmental Risk Management (CERM)

The U.S. Environmental Protection Agency (EPA)  
Office of Pollution Prevention and Toxics (OPPT)

# EPA Sustainable Futures™ Training Workshop Announcement

October 18<sup>th</sup>-20<sup>th</sup>, 2016

To be held at the Afton Chemical Facility located at  
330 South Fourth St. Richmond, VA 23219

## Who Should Attend:

Regulatory Professionals, Chemists/Scientists, Toxicologists, Product Safety Specialists, Product Stewards

## What You Will Learn:

- How the US EPA evaluates new chemical notifications
- How to conduct screening-level hazard, exposure and risk characterizations of your chemicals in the absence of measured data
- Using predictive toxicology to fill in your data gaps without animal testing
- Gain hands-on experience with the same models and methods that the US EPA Office of Pollution Prevention and Toxics (OPPT) employs to perform chemical risk screening and prioritization
- Get the knowledge to take your products out of the regulatory black box
- This workshop satisfies the training requirement for companies interested in formally graduating in the Sustainable Futures™ program. Sustainable Futures™ graduates can take advantage of regulatory incentives in the form of dual PMN/TMEA submissions which effectively reduces the time to market.
- For more information on the US EPA Sustainable Futures™ Program, visit the home page at: <http://www.epa.gov/oppt/sf/> or see below.

**Presenters:** US EPA staff from the Office of Pollution Prevention and Toxics (OPPT) with experience in the EPA New Chemicals Program and Pre-Manufacture Notification (PMN) review process, as well as experts in the screening level methodologies.

**Requirements:** Participants are asked to bring their own laptop computers preloaded with the EPA models for the hands-on portions of the workshop.

**When:** October 18-20, 2016

**Location:** Afton Chemical Facility located at 330 South Fourth St. Richmond, VA 23219

**Sponsored By:** Afton Chemical, Consortium for Environmental Risk Management (CERM) and US EPA/OPPT

**Registration Fee:** \$850.00 includes lunch and snacks!

There is no registration deadline, but space is limited. Registration is available online via the [Registration Page](#)

**For more information:** Please visit our website announcement page at [www.cermonline.com/workshops](http://www.cermonline.com/workshops) or email to [workshops@cermonline.com](mailto:workshops@cermonline.com)

### About Sustainable Futures:

Sustainable Futures™ is a voluntary US EPA initiative that aims to promote the incorporation of Pollution Prevention (P2) methods into chemical stewardship. By participating in this hands-on workshop, you will learn to use a variety of computer-based models and techniques to assess both hazard and exposure components for a chemical substance, as well as how to combine these into a screening-level risk assessment. The workshop includes in-depth presentations and hands-on sessions with the models, and covers the methodology for hazard and risk screening for human health, ecotoxicity and environmental fate.

**Please feel free to forward this announcement to any colleagues that may be interested in attending this training workshop or Sustainable Futures™ in general.**

Best Regards,

Peter B. Ranslow, Ph. D.
